

ECN No: 10
Date: 28 September 2012
Affected Product: Excel Category 6 Unscreened Patch Leads
0.5 m to 5 m Lengths
Effective Date: From November 2012 onwards depending on existing
stock levels

Excel Category 6 Unscreened Patch Leads

As part of Excel's continual improvement programme, the diameter of the cable used in the Category 6 Unscreened Patch Leads has been reduced. The diameter of the cable used for Patch Leads up to, and including, 5 m length is now reduced to 5 mm from 6 mm. This is a 30% reduction in cross-sectional area.

This development has been achieved while maintaining a fully component compliant product. The reduced diameter has been introduced to save on containment space required in ever more congested patching fields. Reducing the diameter also reduces the minimum bend radius needed.

Excel Category 6 UTP booted patch leads are manufactured from enhanced performance cable and RJ45 plugs. The manufactured product is tested to ISO, EN and TIA requirements for patch cord assemblies. Third party independent verification certificates for the Excel Category 6 UTP patch leads have been issued by Delta and ETL assuring component compliance. This component compliance assures that the performance of the installed channel will perform to the highest standards.

- Delta & ETL Component Verified
- Category 6
- LSOH Cable and blade booted jacks
- Individually bagged, in a choice of colours and lengths
- 25 year system warranty available

(Patch Leads above 5 m in length remain unchanged)
